```java
1    public String encodeParameter(...) {
2        String baseUrl = baseUrl(uri);
3        String encodedParams = encodedParams(oauthTimestamp...queryParams);
4        StringBuilder sb = StringUtils.stringBuilder();
5        sb.append(method);
6        sb.append('&');
7        Utf8UrlEncoder.encodeAndAppendQueryElement(sb, baseUrl);
8        sb.append('&');
9        Utf8UrlEncoder.encodeAndAppendQueryElement(sb, encodedParams);
10       return sb;
11   }
```
